

J.N. WHITE DESIGNS

ACCOMPLISHED CUSTOM PRINTERS SINCE 1960

Function User Interface

J.N. White Designs offers a variety of overlay manufacturing capabilities for interface panels. We utilize top-surface and sub-surface printing, texturing and embossing, precision laser cutting and spacer layer technology.

Our cutting-edge technological expertise, combined with a knowledgeable internal staff, results in a superior finished product every time. J.N. White Designs' in-house ink, material and adhesive specialists have an unparalleled grasp of what is required regardless of the application. Using an electronic color calibration/maintenance process, we can accurately match LAB values, densities, and gloss levels, providing exceptional product color match and production consistency on every project.

J.N. White Designs' extensive internal resources eliminate the need for outsourcing, which reduces overall project cost and turnaround time, while streamlining communication between J.N. White Designs and the customer.
